

This weekly report is produced by the United Nations (UN) Migration Agency (IOM) as part of the UN Country Management Team (UNCMT) response to the influx of Burundian and Congolese Asylum Seekers from Burundi. The report covers the period from August 28th to September 3rd, 2017. The next report will be issued on September 11th, 2017.

## Highlights

- 244 new arrivals (128 males and 116 females) all composed of Congolese Asylum Seekers except for 1 Sudanese. The entry points for the arrivals this week were Kigadye (242 persons), Kilelema (1 person), Kyerwa (1 person).
- 308 Congolese Asylum Seekers (149 males, 159 females) were relocated from Manyovu transit center to Nyarugusu camp.
- IOM's fit-to-travel medical screening revealed that, the top five medical conditions among the transported persons during this week were: malaria, skin infections, upper respiratory tract infection, genitourinary disorders, acute watery diarrhoea.

## TRANSPORTATION

### Cumulative Transport Number\*

Figure 1. From Aug 28, 2017 to Sept 3, 2017

Figure 2. Starting From Aug 1<sup>st</sup> to Aug 31<sup>st</sup>

\* The cumulative statistics in the pie charts include newly arriving Asylum Seekers as well as those relocated from transit centers to the camps and or reunified with their family members. The numbers in the bar charts under Figure 2 reflects the accumulative number of people IOM has transport since the inception of this weekly report.

### Background on IOM Response

Since May 2015, IOM has been providing safe and dignified transportation to persons fleeing the crisis in Burundi and entering Tanzania through various entry points along the border between the two countries mainly in Kasulu, Kibondo, and Ngara districts. IOM teams made of operation and medical staff accompanied each pick up exercise. The objectives are to ensure that transported Asylum Seekers are fit to travel and those with urgent and or special medical needs are referred to health facilities ran by health partners such as Médecins sans Frontières (MSF) and Tanzania Red Cross (TRC) for timely and appropriate medical care. Currently Burundian new arrivals are transported to Nduta camp while Congolese are brought to Nyarugusu camp.

### Health

During the reported period, the fit-to-travel medical screenings carried out by the IOM medical team revealed that 37 cases (13 males, 24 females) required medical care. 15 cases required immediate referral to health facilities in the camps. In Nyarugusu camp, IOM Medical referred 12 cases to TRC hospital and they were: 4 cases of acute watery diarrhoea, 1 case of hernia, 2 cases of malaria, 1 case of SGVB, 1 case of epistaxis, 1 case of moderate malnutrition, 1 case of epilepsy, 1 case of infected wounds. In Manyovu transit center, IOM Medical referred 2 cases to IRC clinic and they were: 1 case of hernia, 1 case of abscess. In Lumasi transit center, IOM Medical referred 1 case of hypertension to TRC clinic.

Additionally, there were 8 pregnant women at different gestational age who require ante-natal, intra-natal and post-natal care among the new arrivals.
